

JENKINS INTERVIEW QUESTIONS:LTS

1. "Pipeline as Code in Jenkins"
2. "Difference between Declarative and Scripted pipeline"
3. **"What stages do you use in your CI/CD pipeline?"**
4. "How do you trigger a pipeline automatically on code push?"
5. "How do you store credentials securely in Jenkins?"
6. "How do you manage secrets in CI/CD?"
7. "What is a Quality Gate?"
8. "How does SonarQube fail the pipeline when quality gate fails?"
9. "What does waitForQualityGate do in the pipeline?"
10. "If a Jenkins job fails, how do you troubleshoot?"
11. "If a pipeline is slow, how do you optimize it?"
12. "Where do you store credentials in Jenkins?"
13. "What is Jenkins shared library?"
14. "What are default variables in Jenkins?"
15. "What is agent any in Jenkins?"
16. "What is label in Jenkins?"
17. "Can we run parallel stages in Jenkins?"
18. "Can we run a stage on a specific agent?"
19. "How do you trigger pipeline on code push?"
20. "How do you integrate SonarQube?"
21. "Design CI/CD pipeline for microservices?"
22. "What are the types of pipelines in Jenkins?"
23. What is Jenkins and why do we use it?
24. Explain your CI/CD pipeline stages.
25. Jenkins service is down. How will you troubleshoot?
26. Jenkins is not accessible on browser. What could be the reason?
27. What is the purpose of PollSCM and Build periodically?
28. How do you enable multibranch pipeline?
29. Where are Jenkins logs stored in Linux?
30. Write a basic Jenkins pipeline syntax.
31. What is Blue-Green deployment and how have you implemented it using Jenkins?
32. How do you automate a process using a Jenkins pipeline?
33. How do you integrate tools like SonarQube, Maven, Docker, or Ansible into a Jenkins pipeline?
34. How do you pass parameters or variables to a Jenkins pipeline?
35. What types of Jenkins pipelines have you implemented?
36. What stages have you used in your pipeline?
37. What is a Jenkins job?
38. What are common Jenkins issues you have faced and how did you resolve them?
39. Where is Jenkins configuration stored when installed on EC2?
40. How do you back up Jenkins before upgrading?

41. How do you secure a Jenkins project?
42. How do you integrate Jenkins with Ansible?
43. What is the difference between Continuous Delivery and Continuous Deployment?
44. How do you trigger a pipeline only for a specific branch?
45. How do you ignore pushes from certain branches?
46. How do you trigger a pipeline when a PR is raised?
47. How do you use multi-branch pipelines in your project?
48. How do you integrate S3 with Jenkins?
49. Explain end-to-end CI/CD workflow using Jenkins.
50. How do you configure Jenkins from scratch?
51. How do you shorten a pipeline that takes 45 minutes?
52. What common Jenkins production issues have you handled?
53. Which CI/CD tool did you use and why?
54. Why do we need nodes in Jenkins?
55. What are upstream and downstream jobs in Jenkins?
56. What are post-build actions in Jenkins?
57. What is an agent in Jenkins?
58. What is the difference between master and slave configuration?
59. If a slave node is not working, how will you troubleshoot it?
60. How do you create a multi-stage pipeline?
61. Explain the Jenkins pipeline script you wrote in your project.
62. What stages do you include after Maven build and vulnerability scanning?
63. How would you design a single pipeline to deploy 10 microservices to Dev?
64. How do you ensure the test stage runs only after a successful build?
65. What is artifact management in CI/CD?
66. How do you ensure new code commit triggers Jenkins automatically?
67. How does Jenkins connect with Kubernetes?
68. How do you change an image tag in Kubernetes using Jenkins?
69. How does Jenkins integrate with Docker for image build and push?
70. What is the purpose of withDockerRegistry in Jenkins?
71. A Jenkins stage fails due to credential issues — how do you fix it?
72. How do you manually trigger a job when approval is required?
73. What happens if Quality Gate fails and abortPipeline: false is set?
74. If Maven build stage is taking more time, what could be the reasons?
75. If a pipeline fails due to missing environment variables, how do you fix it?
76. A job works in Dev but fails in Production — how do you troubleshoot?
77. How do you handle rollback in a pipeline?
78. If version 1.2 deployment fails but 1.1 is stable, what will you do?
79. What is concurrency issue in pipelines?
80. How do you calculate approvals before production?
