

DOCKER INTERVIEW QUESTIONS

1. "What is Docker?"
2. "Explain Docker architecture."
3. "What is the difference between Docker image and Docker container?"
4. "What is the difference between COPY and ADD?"
5. "What is the difference between CMD and ENTRYPOINT?"
6. "How do you reduce Docker image size?"
7. "What is a multi-stage Docker build?"
8. "What is Docker Compose?"
9. "What is Docker Swarm?"
10. "What are Docker volumes?"
11. "What does EXPOSE 8080 do in a Dockerfile?"
12. "How do you get a running container's IP address?"
13. "Reduce Docker image size?" (same as reduce image size)
14. "Difference between COPY and ADD?" (same wording variation)
15. "Difference between CMD and ENTRYPOINT?" (same wording variation)
16. "What is Dockerfile?"
17. "Write a Dockerfile."
18. What is Docker and explain its architecture?
19. What is the difference between containers and virtual machines?
20. How do containers share OS resources?
21. How does resource allocation work for containers?
22. **What are namespaces in Docker?**
23. What are Docker layers?
24. What is the Docker container lifecycle?
25. What happens internally when you run docker run?
26. Why does using only Docker (without orchestration) cause downtime?
27. What are the components of a Dockerfile?
28. Write a lightweight Dockerfile for an Nginx web server.
29. Write a multi-stage Dockerfile for a Java application.
30. Write a Dockerfile for a simple web application.
31. Can we write a Dockerfile without a base image?
32. How do you reduce image size using multi-stage builds?
33. How do you build a Docker image?
34. How do you build a Docker image and run a container?
35. How do you see container logs from the host machine?
36. Where are Docker logs stored in Linux?
37. How do you remove unused Docker containers?
38. Write a command to run an nginx container.
39. How do you attach a volume to a container?
40. How do you enter inside a running container?
41. What command do you use to delete a container?

42. How do you create an image from a running container?
43. What Docker commands do you use regularly?
44. How do you troubleshoot a running container?
45. **How do you troubleshoot container memory leaks?**
46. What are Docker networks? Explain each type.
47. What is a Docker volume?
48. How does Jenkins integrate with Docker?
49. What is withDockerRegistry?
50. How do you secure Docker images and containers?
